

ACCESSING VOICEMAILS ON TELEPHONE PROCESS

It is important that the Selectors on the day check the phone for voicemails as players sometimes ring in to either put their name down for a game or to advise that they are not able to play.

Turn on the phone – the green symbol on the left.

Press the key with the envelope icon – on the right hand side.

Cursor down to the envelope icon on the screen.

Hit Select.

Turn on the speaker to make it easier to hear the instructions and any messages.

Enter the password 450745 and then #. This password is taped to the back of the phone.

Follow the prompts on the phone to listen to the messages.
